SUMMARY

Passionate data and software professional with 3+ years of industry experience in data engineering, software development, analytics, and automation within the banking sector. Holding a Master's degree in Computer Science from NUS Singapore, with recent experience supporting OCBC Bank's Enterprise Big Data platforms and Enterprise Data Warehouse (EDW). Skilled in orchestrating large-scale data workflows, optimizing system performance, and ensuring accurate, timely data delivery for mission-critical functions.

TECHNICAL SKILLS

Programming Languages: Python, SQL, Teradata, jBASE, JavaScript, ReactJS, Shell Scripting.

Data Tools & Platforms: Power BI, Tableau, Hadoop, Spark, Yarn, Hive.

Operating Systems: Windows, Linux, Unix.

DevOps & Collaboration Tools: GitHub, Bitbucket, AWS, Docker, JIRA, Control-M, Jenkins.

WORK EXPERIENCE

OCBC Bank (via NTT Data), Singapore

DATA ENGINEER – FULL TIME

FEB 2025 – PRESENT

- Ensured stability and reliability of Enterprise Big Data platforms (EBP) and Enterprise Data Warehouse (EDW), supporting critical bank operations at OCBC Bank Singapore.
- Monitored and managed daily job executions in production environments, swiftly resolving failures to minimize service disruptions.
- Contributed to platform enhancements by upgrading frameworks and optimizing data workflows for improved performance and scalability.
- Collaborated with cross-functional teams to troubleshoot data issues, perform root cause analysis, and implement long-term fixes.
- Implemented monitoring dashboards and alerting systems to detect anomalies and ensure high availability of data services.

Temenos India Private Limited, Chennai, India

SOFTWARE ENGINEER – FULL TIME

JAN 2020 – OCT 2022

- Developed automation solutions and analyzed issues using T24BD, with strong knowledge in SQL, PowerShell scripting, and CI/CD with Jenkins.
- Led end-to-end automation for product onboarding within the DevOps cycle, reducing manual regression effort by 60% and earning the Team Award in 2021.
- Specialized in core T24 areas: COB, Batch Processing, and Template Programming.
- Optimized and maintained internal testing tools (SEAT framework) with jBASE.

INTERNSHIPS

Education Board, Science Centre Singapore

DATA ANALYST INTERN – FULL TIME

MAY 2024 – SEP 2024

- Performed data pre-processing, EDA, and KPI reporting on Education Platform and Young Scientist Badge datasets using R and Python.
- Developed interactive dashboards using R Shiny and automated user-activity monitoring using UiPath RPA.
- Collaborated with cross-functional teams to define KPIs and translate insights into actionable recommendations.

Little Prince Game Studio, Singapore

PROGRAMMER INTERN – FULL TIME

MAY 2023 – JUN 2023

- Automated the iOS game build process with Jenkins and facilitated log/report uploads to AWS after every build.
- Implemented CI/CD processes using Bitbucket and Jenkins; optimized pipeline performance and reduced build time.

EDUCATION

National University of Singapore (NUS), Singapore

MASTER OF COMPUTING (COMPUTER SCIENCE)

JAN 2023 – NOV 2024

- Relevant Coursework: Fundamentals of Data Analytics & AI, Data Mining, Big Data Systems for Data Science, Software Engineering, Hands-on with Applied Analytics.

Anna University – PSG Institute of Technology and Applied Research, Tamil Nadu, India

BACHELOR OF ENGINEERING (ELECTRONICS & COMMUNICATION)

AUG 2016 – AUG 2020

- Relevant Coursework: Object Oriented Programming, Algorithms & Data Structures, Operating Systems, Computer Networks.
